"My children are 8 and 13 years old. They had never been to the dentist before because we had no insurance and could not afford to pay dental bills. For us, FirstHealth Dental Care was a lifesaving, or should I say tooth-saving, program."

Early morning and Saturday appointments are available.

To make an appointment or for more information, call (910) 692-5111.
Welcome!
Thank you for choosing FirstHealth Dental Care for your child’s dental health needs. Our purpose is to treat children from birth to age 21 with the utmost respect while delivering the highest quality of comprehensive, preventive-focused care.

Our Services
- Exams
- Cleanings
- Silver fillings
- White fillings
- Pulling of teeth
- Spacers
- Preventive Services: Sealants and Fluoride Varnish

Dental Emergencies
If your child has a dental emergency, we will try our best to work him or her into the schedule within 24 hours. The best time to call is in the morning.

Keeping Your Child’s Teeth Healthy
- Help your child brush and floss his or her teeth.
- Make sure your child eats fruits and vegetables and drinks plenty of milk.
- Limit candy and sugary drinks.

You Can Help, Too!
We work hard to take care of your child’s teeth, but we need help from you!
What can you do?
- Bring your child to their first dentist appointment by age one.
- Let your child see the dentist and hygienist alone so he or she will become a great dental patient.
- Call the office if you cannot make the appointment. If your child misses two appointments without calling, he or she may only be seen on an emergency basis for up to a year.
- Tell your friends about FirstHealth Dental Care!
