

# Interventional Pain Medicine

FirstHealth Interventional Pain Medicine offers advanced procedures for the treatment of pain. A team of physicians double-board certified in anesthesia and pain with years of training and experience staffs the centers. This team uses fluoroscopy in the performance of all injections in or around the spinal column. This improves the safety and efficacy of the interventions and helps patients to get better faster.

## Treatments for back pain include:

- Epidural steroid injections
- Selective nerve root blocks
- Facet injections
- Discography
- Radiofrequency denervation of the facet joints
- Sacroiliac joint injections
- Trigger point injections
- IDET Intradiscal Electrothermal Therapy
- Piriformis muscle injections

## Treatments for neck pain include:

- Cervical epidural steroid injections
- Selective nerve root blocks
- Radiofrequency facet
- Facet injections denervation
- Greater occipital nerve blocks
- Trigger point injections

## Treatments for Sympathetic Pain (RSD):

- Stellate ganglion blocks
- Lumbar sympathetic blocks
- Peripheral nerve blocks
- Epidural sympathetic blockade

## Treatments for Cancer Pain:

- Celiac plexus blocks and neurolysis
- Peripheral nerve blocks and ablations
- Intrathecal & epidural neurolysis
